MAIL BID LIST #9

CLOSING

JAN 6 1985

In this listing collectors can find Mexican hacienda tokens as well as an offering of scarcer Costa Rica and Guatemala plantation tokens. Among the South American listings are one of the earliest Nitrate mine tokens from the Paccha site. Shooting medal enthusiasts should look at the Austrian and Swiss sections for a number of 19th Century pieces. An interesting series of Portugal tokens can be found along with tokens of its colonies of Madeira, Mozambique and São Tome.

Among the U.S. issues included are a number of scarce Illinois cardboard and Tenino wood provisional Sales Tax Tokens. A scarce Payson, Utah, saloon piece is described as well as several from California. Look for some important groupings of Chicago merchant tokens. One lot is mainly made of tokens from before 1930 and mostly of unlisted pieces. A wide assortment of U.S. military checks from sites around the world are described in sections throughout this list.

Lot descriptions are of necessity brief and oriented to numismatists. Sizes are usually in millimeters, although larger paper items are often in inches. Pieces are considered to be round unless otherwise indicated. Metals are shown as Al, Br, Cop, Nkl, Ir or Zn or Pl(astic). Parentheses are often used and mean that the information found enclosed is not usually found on the piece. Catalog numbers encountered are found in such (e.g. L#101.3) and refer to the most standard work for the topic at hand. Since listing each reference would be too awkward, please write if you need to know. Dollar values in parentheses, e.g. (\$25) mean an estimated market value. An "MB" enclosed with the dollar value means "Minimum Bid" or reserve placed on a lot. Comments on my listings and methods of operation are always welcome.

Likewise several Portuguese colonial pieces went for \$68, \$62 and \$50 (#371, 372 and 373). The W.H. Bush & Co. advertising counter went for \$58 (#629).

An innovation for this issue of Prices Realized is the addition of a third column. The first two are the lot numbers and final selling price. The third figure found in parentheses is the number of bidders on that particular lot. Any lots not listed either received no bids or bids too low for consideration.

The 1935 Washington aluminum Sales Tax Token was the first of such to be issued by one of the states. 750,000 were put into circulation as of May 1, culminating in a total of 60 million. They are still plentiful in outstanding condition. As a way to commemorate their introduction to taxpayers one was struck in gold, ten in silver and fifty in copper. They were distributed as presentation pieces to administrators and employees of the then Tax Commission. Neither Mike Pfefferkorn or I had seen any of the gold or silver by the time CHITS, CHISLERS AND FUNNY MONEY had been printed. To my knowledge neither has ever appeared on the numismatic market. In sixteen years I have seen four of the coppers and had reports of two others. Presumably all others are in the hands of the employees or their families. One of the copper pieces is offered here. It appears for sale less frequently than the Astoria, Illinois, provisional issue. See Lot #669.
